

MLSP

GO FURTHER. RELATIONSHIP WITH US

**MLSP Provides Optimal Logistics Solutions
to meet Customer Needs**

MLSP

“GO FURTHER RELATIONSHIP WITH US”

Company Information

Logistics means cheaper, safer, and faster transportation of goods entrusted by customers to domestic and international destinations.

In order to faithfully carry out this basic task, Many parts are required, such as "Securing Optimal Rate", "Detailed Operation", "Selection of appropriate transportation Service, and "Irregular Response", And these cannot be accomplished overnight.

MLSP is devoted to the fundamentals of logistics.

We can provide the best service for each region and transportation mode by concentrating the work capabilities of each experienced employee around the world.

MLSP value communication with our customers.

Under the slogan "**GO FURTHER. RELATIONSHIP WITH US**", We faithfully carry out our client's needs, And make suggestions that are helpful to our clients. We aspire to grow together with our clients mutually

MLSP pursue "ESG Management".

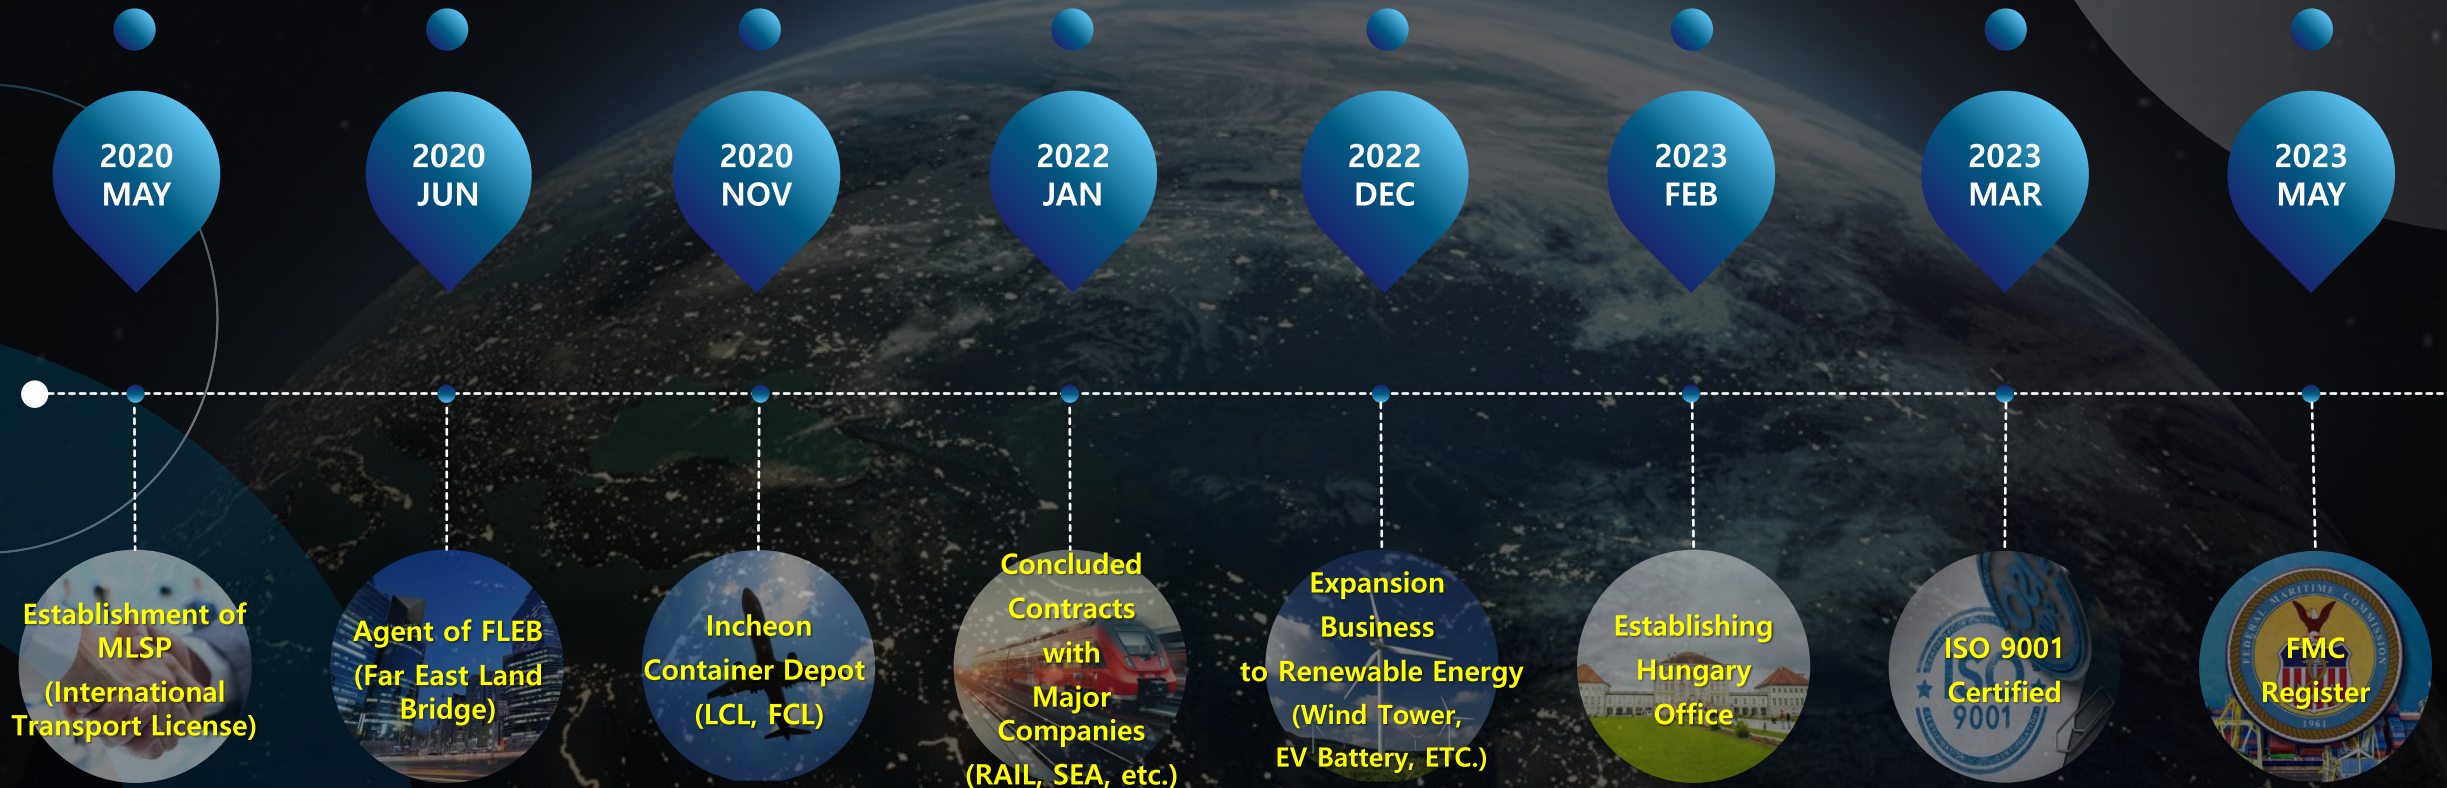

We support the "commitment of limit global temperature rise by 1.5°" by the international community, especially in the field of environment. We have specialized services for rail transportation, which emits less carbon dioxide than ships and aircraft, and are expanding the transportation of "Wind Power Generation Facilities" & "EV Battery" parts for renewable energy production.

We will do our best to give you the most satisfaction service beyond your expectation

03

Product & Services

The Pioneer of Rail Transport Business
Linking Asia and Europe since 2007

Possession of railroad know-how linking "Europe & CIS" with "Asia" such as Korea, Japan, Vietnam, and Taiwan

- Transportation of major cargoes (SK, LG, POSCO) to Europe
- Transportation of used cars, etc. to CIS
- Established a long-term close collaboration system with carriers in China, Russia, and Europe (container local sales and purchases)
- Reefer container, Dangerous Goods, Battery subsidiary materials Possible
- Proposal of optimal rail service (route) for each market situation

Main Asia (KR/ CN/ VN/ JP)

EU & CIS RAIL FCL, LCL SERVICE !

04

Rail

Industries

Aerospace

- Experience in stable transportation of aerospace industry parts (production, development)
 - Check for strategic cargo before export/import (Any restriction or limit)
 - Pre-check whether customs clearance is possible

Automotive

- Stable transportation of general vehicle and electric vehicle related parts in progress
- Transportation of related materials such as cathode materials and trays for electric vehicle battery production
- Shipping by all kind of Transportation (AIR, SEA, Rail)

Consumer

- Providing SCM solutions to reduce total cost
- Increase efficiency for logistics & warehousing
- VMI Service (Incheon & Busan)

Electronics

- Stable transportation of various electronic products (finished products and materials)
- Worldwide Transporting (Import / Export)

Fashion & Retail

- High quality service to fashion industry providers
- transport fabrics for special purposes such as bulletproof vests other than general fabrics
 - Check for strategic cargo before export/import (Any restriction or limit)
 - Pre-check whether customs clearance is possible

Healthcare

- Air transport of pharmaceuticals requiring temperature control
 - Possible to maintain the specific temperature during the entire section from pick-up to delivery

Semicon/Solar

- Plan for Transportation of raw and subsidiary materials necessary for the production of renewable energy products such as solar panels

Wind Power

- Stable transportation of key parts installed in wind power generators (Denmark, USA, Spain, Germany, Vietnam)
 - Bearings, lower materials
- Transporting flanges connected to towers
- Plan to transport finished hub assembly products connected to blades (wings) and rotors.

Eco-friendly Trade

Expansion of transportation services for "Products of Renewable Energy Production"

Transportation of
"Wind-Tower Parts"
for Wind-Power Generators

- Top quality **slowing bearings**
- **Stable support** for the load of large machines
- **Transportation expertise** for wind power

Transportation of
"Parts of Electrical Cars"
(Secondary Batteries)

- **Minimize Air Pollution** through emission reduction
- Transportation of Products relating to **Improving The Environment**
- Secondary Batteries **Charging Solutions**

Expansion of transportation
to "Solar / Hydrogen Energy
Production Facility Parts"

- **Advance "solar system and service field"**
- **Expand supply** of solar cell parts
- **Stabilization check** for continuous development

Low-carbon, Eco-friendly
Transportation

Strengths of Rail Transport

TRUCK

SEA

AIR

**Rail
Transportation**

- Eco-friendly
- Railways with high energy efficiency
- CO2 emissions reduction
- Suitable Transportation for the era of environmental pollution

Efforts to lower carbon emissions to prevent Earth's average temperature from rising

Expansion of transportation of parts or solutions for **"Eco-Friendly products"** or **Renewable Energy Production** (Carbon Emission Reduction/ CO2 Reduction)

Participate in a campaign to reduce CO2 emissions with MLSP's overseas partners located around the world
